The Coronavirus surprised me because since it happened in China first I expected the US to take quick measures, but it didn't happen until it was too late. I am surprised that I still have to pay the same amount of rent since the quarantine even when I stopped work. I became extremely sick and had difficulty breathing on March but I stayed at home instead of going to the hospital for 2 reasons. First I didn't have the budget and secondly I have a higher chance of contacting the virus if I didn't have it before. I witnessed a lady in pain while being carried to the ambulance wrapped up.

The one positive outcome from the quarantine is that I got to spend time with my family,(although it drove me nuts sometimes) and I had time to learn graphics animation. My hope for the future is that we learn from this experiences and never let it happen again... people have lost loved ones..

Doctors are true heroes
